

Who Am I?

Using the list of Animal Phyla presented in this unit, you will create an animal phylum multimedia presentation.

Presentation Guidelines

You need to pick 6 of the phyla presented in the chart and research the characteristics of each including but not limited to...

1. Name Meaning / Significance
2. Distinguishing Characteristics
3. Unique / New Information
4. 1 representative family + pictures
5. 2 representative geneses + pictures
6. 3 representative species + pictures

Present your work in a creative “Who am I?” format. Your presentation should describe characteristics, show pictures and end with the question, “Who am I?” After the question, use the animation tools or a new slide to name the phylum represented. Complete the same process for all 6 phyla.
