

Here are your terms from GA Virtual School's Oceanography class' unit on Chemical Oceanography.

For twenty points, define twenty of them.

- Polar
- Cohesion
- Adhesion
- Capillary action
- Universal solvent
- Specific heat
- Heat capacity
- Hydrogen bonds
- Latent heat of vaporization
- Hydrosphere
- Evaporation
- Transpiration
- Respiration
- Condensation
- Precipitation
- Infiltration
- Runoff
- Hydrologic cycle
- Salinity
- Desalination
- Density
- Freezing point
- pH
- Buffers
- Dissolved oxygen
- Diatomic
- Manganese
- Phosphorus
- Nitrogen
- Silicon
