Credits: .5 (90 day course)

Recommended: 11<sup>th</sup>, 12<sup>th</sup>

Prerequisite: none

Test Prep: CLEP Psychology

Course Description: This course introduces students to the scientific study of human behavior and mental processes. Students will study the major subfields of psychology and the major contributors to the field. Ethics and methodology will be explored. This course is based on the Georgia Virtual Learning Shared Resource Psychology curriculum. **Disclaimer: There are references to sexual behavior throughout this course. You decide if you want to use it. This course is a required college pre-requisite for my daughter's major, and I wanted her to be able to CLEP out of it. As such, I have included content regarding Sigmund Freud's theories and others that I believe is completely ungodly, but necessary for her to know to have a comprehensive understanding of this subject. Some of the videos also reference "sexual excitement" and other terms that I wish were not included. I have tried to avoid content that blatantly mocks our faith or is overtly sexual, but I may have missed some things that others would find offensive. As a nurse and counselor, my training has probably numbed me to some other content that some of you may find objectionable. Please use your own discretion.**

Day 1\*\*

1. \*Print out your [grading](#) sheet or use the [Excel](#) version.
2. Go to [Unit 1, page 1](#). Read the Essential questions and introduction.
3. \*At the bottom of page 2, print out your [vocabulary list](#).
4. Listen to about the first third of the Introduction to Psychology [presentation](#) on page 2. Try to fill in definitions for the terms you don't know as you listen.

Day 2-3

1. Watch the rest of the introductory [presentation](#) on page 2 that you started yesterday. Take notes. (This is long, but covers all of the material for this unit. I have given you two days to cover it.) Fill in the vocabulary as you hear it.

Day 4\*
